Brief Project Description

Coins Rating brings a cutting-edge platform designed to empower crypto enthusiasts, traders, and investors with reliable market insights and strategic opportunities.

Coins Rating harnesses the power of AI to curate up-to-date market data, facilitate strategic decision-making, and offer unparalleled insights.
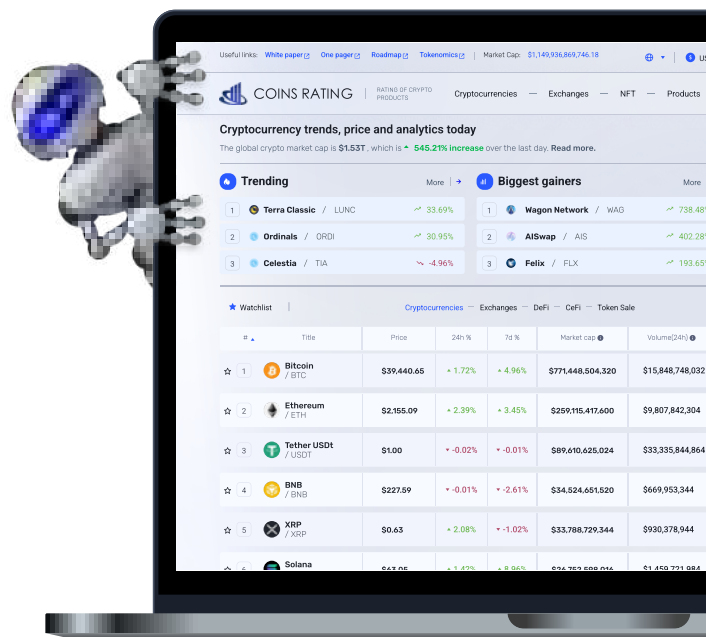

Our Mission

Help people to make informed decisions and navigate the crypto landscape with confidence.

Our Vision

To empower people with unbiased, high-quality, and accurate cryptocurrency information at the opportune moment, providing users with a trusted and informed guide through the complexities of the ever-expanding cryptocurrency market.

Coins Rating Provides

AI-Driven News and Real-Time Insights

Coins Rating provides up-to-date crypto market data and news, meticulously verified by AI. Stay informed with real-time insights, enabling you to make informed decisions in a rapidly changing market.

AI-Based Portfolio Recommendations

Our platform goes beyond ratings; it offers personalized AI-driven portfolio recommendations. Tailored to your risk appetite and market trends, these recommendations empower you to optimize and diversify your crypto holdings.

AI Arbitrage Signals in Multiple CEXs, DEXs for Trading Bots

Unlock strategic opportunities with our AI-generated arbitrage signals. Whether you're on centralized or decentralized exchanges, our signals cater to trading bots, ensuring you stay ahead in the market.

AI-Based Non-Biased Cryptocurrency Exchanges Ranking

Transparency is at the core of Coins Rating. Our AI-based ranking system provides an unbiased assessment of cryptocurrency exchanges, helping you identify trustworthy platforms for your trading needs.

CRT Utility Token

The CRT utility token is the backbone of Coins Rating, offering exclusive benefits to our community. From discounted services to learn2earn incentives, CRT adds value to crypto journey, fostering an ecosystem of mutual growth.

As we embark on this transformative journey, Coins Rating seeks to redefine how users interact with the crypto market.

Problem Statement

In the ever-expanding landscape of cryptocurrency, investors and enthusiasts face numerous challenges that hinder their ability to make informed decisions, manage portfolios effectively, and stay ahead in the dynamic market.

Coins Rating identifies these challenges and offers innovative solutions to empower both B2B and B2C users.

Current Challenges

Information Overload and Fragmentation

Users struggle with the overwhelming amount of information available across various platforms, leading to difficulty in making informed decisions.

Risk Management and Portfolio Diversification

Investors face challenges in managing risks and diversifying their portfolios to mitigate potential losses.

Limited Access to Quality Data

Obtaining accurate and timely market data is a common challenge, impacting the ability to make well-informed investment choices.

Complexity in Identifying Profitable Opportunities

The cryptocurrency market's complexity poses challenges for users in identifying profitable investment opportunities.

Offered Solutions

By addressing these challenges through AI-driven solutions and innovative features, Coins Rating aims to revolutionize the way users interact with and navigate the cryptocurrency market, offering a comprehensive and user-friendly platform for both individual and business needs.

AI-Powered Crypto Tracking
Coins Rating utilizes advanced AI algorithms to track cryptocurrency prices and trends, providing users with up-to-date and accurate market data.

Portfolio Management Solutions
AI-based portfolio management tools assist users in optimizing and diversifying their portfolios for effective risk management.

Arbitrage Signals for Profitable Opportunities
Coins Rating offers AI-powered arbitrage signals, helping users identify and capitalize on profitable opportunities across various exchanges.

Customizable Indexes for Tailored Insights
Users can create and customize their indexes, gaining tailored insights into specific market sectors and trends.

Fraudulent News Check
The platform employs AI to verify news and filter out fraudulent information, ensuring users have access to trustworthy and reliable data.

Advertiser Dashboard for Targeted Campaigns

Coins Rating introduces an advertiser dashboard, enabling businesses to create and manage targeted advertising campaigns. This feature provides a platform for advertisers to reach their desired audience effectively.

Market Overview

The cryptocurrency market has evolved rapidly, with the global market capitalization exceeding $1.58 trillion in 2023.

Growth and Revenue

Up-to-date Crypto Market Data & News Verified by AI

In the ever-evolving realm of cryptocurrencies, access to real-time market data and verified news is paramount for making well-informed decisions. Coins Rating introduces an innovative system driven by artificial intelligence, reshaping how users interact with cryptocurrency information.

Bots scan for crypto-impacting news

They search for crypto news on the Internet for 24/7

API sends news, signals to trading software

API sends news, signals to external trading software, trading bots using Websockets, FAST protocols

Fact checking and duplicates curation

AI executes fact or fake checks and removes duplicating data

Notifications on web and mobile app

Push-notification informs the user about the most important news

AI-based news classification

AI classifies news on positive, neutral, negative scale

AI assesses the impact of news on the value of the coin

AI's predictive model calculates the net effect and makes a recommendation to the client whether to Buy / Hold / Sell

Operational Mechanism

Configuration of Personalized Preferences

Users initiate the process by defining their criteria, specifying preferences such as favorite cryptocurrencies, market sectors of interest, risk tolerance, and specific data points crucial to their decision-making.

AI Analysis and News Verification

Cutting-edge AI algorithms conduct comprehensive analyses of cryptocurrency markets, sifting through vast amounts of data to provide users with verified news and up-to-date market insights.

Customized Alerts and Signals

Users can set personalized alerts and signals based on their preferences, ensuring they are promptly informed about significant market developments and news relevant to their portfolios.

Real-Time Market Overview

The platform provides users with a real-time overview of the cryptocurrency market, including price movements, trading volumes, and relevant news, all verified by AI for accuracy.

Advantages for Client

Informed Decision-Making

Access to verified news and accurate market data enhances users' ability to make informed decisions.

Timely Alerts and Signals

Customizable alerts ensure users are promptly notified of significant market developments and news relevant to their portfolios.

Prevention of Misinformation

AI verification prevents the spread of misinformation, creating a more reliable information environment.

Holistic Market Overview

Real-time market overviews and analytics provide users with a comprehensive understanding of the cryptocurrency market.

One-Click AI-Based Portfolio Management

In the dynamic landscape of cryptocurrency investments, precision and agility are the key. Coins Rating introduces an advanced AI-based portfolio recommendation system, revolutionizing the way users engage with their digital assets.

This innovative feature ensures that users, whether seasoned investors or newcomers, can effortlessly navigate the complexities of the market and optimize their portfolios for maximum returns.

AI suggests coins for the user in line with the preferences

AI-power suggestions on portfolio composition based on the user preferences such as volume

Multi wallet support

Information about the digital assets from multiple wallets conveniently aggregated in one place on Coins Rating

AI helps to balance portfolios

AI-powered management made easier with re-balancing suggestions

Multiple portfolios for different investment goals
Reaching different investment goals with simultaneously tracking multiple portfolios rom one convenient dashboard

Accurate information at the right time

Push-notifications about portfolio changes, bookmarked coins and projects followed

Portfolio Formation

User-Defined Portfolio Parameters

Clients initiate the process by specifying essential portfolio parameters, including preferred cryptocurrencies, desired investment amount, and risk preferences.

Comprehensive AI Analysis

The AI powerhouse conducts a thorough analysis of the specified assets and their corresponding projects, leveraging advanced algorithms to generate a list of tailored suggestions for portfolio inclusion.

User Empowerment

Users are presented with the curated list of AI-generated suggestions and have the flexibility to choose individual assets or opt for the entire list, ensuring a personalized touch to their investment strategy.

One-Click Portfolio Formation

With a simple click, users receive a well-balanced portfolio that aligns with their specified parameters. The system ensures that the portfolio is not static, instead, it evolves with the market dynamics, providing users with regular rebalancing recommendations for optimal performance.

Managing portfolios becomes a breeze with AI-powered re-balancing suggestions. The system not only assists in the initial creation of a well-structured portfolio but also ensures its continuous optimization for sustained success.

To ensure this Coins Rating also provides

Multi-Wallet Support

Users can conveniently aggregate information about their digital assets from various wallets in one centralized location, streamlining portfolio

management.

Diversification with Multiple Portfolios
Recognizing that users may have diverse investment goals, Coins Rating facilitates the tracking of multiple portfolios simultaneously. This empowers users to pursue different investment strategies from a single, intuitive dashboard.

Timely Notifications for Informed Decisions
Coins Rating delivers accurate information at the right time. Users receive push notifications about portfolio changes, bookmarked coins, and projects they follow, ensuring they stay informed and can act promptly in response to market developments.

Embark on a journey of empowered cryptocurrency investment with Coins Rating's AI-Based Portfolio Recommendations. Whether you're seeking simplicity in portfolio management or the sophistication of personalized suggestions, our platform ensures that your digital assets are optimized for success.

AI arbitrage signals in multiple CEX, DEXs for trading bots

Our system scans CEXs and DEXs for real-time price discrepancies, identifies optimal arbitrage paths with high-precision signals, and facilitates automated or manual trade execution across exchanges, maximizing profitability.

Key Features

Low latency connection to leading exchanges

Immediate access to the leading CEX and DEX order books

AI-powered search for arbitrage opportunities

Quick selection of arbitrage trading opportunities within the subscription-based service

Accurate profit calculation before deal confirmation

Accurate and timely calculation of the arbitrage trades results accounting for gas and intermediary fees before the deal

AI suggests the most suitable deals for the client

AI suggests the best arbitrage deals for the user based on the preferences such as the volume, blockchains, exchanges, ROI, etc

Omni-channel arbitrage signals on the go

Arbitrage deal signals straight to the website, Telegram or trading platform of the user

Clean visualization of complex deals

Coherent visualization of complex chains of arbitrage deals within one easy-to-use UI

FAST protocol for trading data exchange

Using the world's cutting-edge standards for fast trading data transfers via APIs

Trading instructions made simple with ChatGPT

Creating of arbitrage trading scripts written in regular language without the need for coding skills or complex set-ups

Partnership with developers of trading software

Seamless integration with trading software for deal execution with minimal latency

AI-Based Non-Biased Crypto Exchanges Ranking

Coins Rating introduces an AI-driven, non-biased cryptocurrency exchange ranking feature. This innovative solution revolutionizes the way investors assess and choose exchanges, offering a comprehensive and objective evaluation based on a multitude of crucial parameters.

Non-biased transparency

AI is immune to human imperfections, like prejudice, favoritism and corruption, thus it ensures that the ranking of cryptocurrency exchanges is fair, transparent and objective.

Real-time accuracy

AI provides live and accurate ranking of crypto exchanges, taking into account large amounts of data, while identifying the patterns that humans may miss. As a result investors make more informed decisions.

White-label solutions

Provide customers with AI-powered crypto exchange ranking feature without developing own infrastructure.

Operational Parameters

Liquidity
AI considers the liquidity of exchanges, analyzing the depth and availability of assets for seamless trading.

Web Traffic
The web traffic of exchanges is assessed to gauge user engagement and popularity.

Trading Volume (Filtered and Normalized)
AI evaluates trading volumes, filtering and normalizing data to provide an accurate representation.

Order Book Spread
The spread in the order book is analyzed, ensuring users are informed about potential slippage.

Market Activity
The overall market activity on exchanges is considered, reflecting the vibrancy and attractiveness to traders.

Bug Bounty & Cyber Security
Security measures, including bug bounty programs and cyber security protocols, are assessed to guarantee user protection.

Team Publicity
The visibility and reputation of exchange teams within the crypto community are factored into the ranking.

Incident History
AI analyzes incident history, considering past events and how they were handled.

Proof of Reserves

Verification of exchange reserves is a critical parameter, ensuring the financial stability of the platform.

Regulatory Compliance

The extent to which exchanges adhere to regulatory standards is evaluated for user trust.

Customer Support Metrics

The quality and responsiveness of customer support are integral to user satisfaction.

User Satisfaction Surveys

Direct feedback from users through satisfaction surveys contributes to the overall ranking.

Security Measures

Additional security measures implemented by exchanges contribute to their overall score.

Key Features

Non-Biased Transparency

Eliminating human biases, prejudice, and favoritism, AI ensures a fair, transparent, and objective ranking of cryptocurrency exchanges.

Real-Time Accuracy

AI provides a live and accurate ranking, processing vast amounts of data in real-time, identifying patterns imperceptible to humans, and enabling investors to make more informed decisions.

Comprehensive Offerings

Beyond rankings, Coins Rating expands its suite to include news updates, trading signals, and portfolio management.Users benefit from a comprehensive package, providing valuable insights and enhancing their crypto experience.

Setting New Standards

Coins Rating establishes a new benchmark for transparency, reliability, and fairness in the crypto industry. Users can confidently navigate the crypto landscape, assured of trustworthy information and clarity.

Coins Rating does not just rank exchanges, it reshapes the crypto experience by providing a holistic solution for businesses and users alike. With white-label solutions, comprehensive offerings, and a commitment to setting new standards, Coins Rating becomes a trusted ally in the dynamic world of cryptocurrency.

CRT Token

The CRT token is an essential part of the Coins Rating economic engine. It is designed to provide a lot of benefits both to B2B and B2C customers within the Coins Rating ecosystem products and plays a key role in improving the platform's value proposition.

CRT Token Utilities

Users, both B2B and B2C, can leverage CRT tokens for payment, unlocking the advantage of **up to a 30% discount** on various services offered within the CoinsRating platform:

- **Paid API access**

- **Listing of tokens and exchanges**

- **Premium and pro-level subscription for AI-based services**

Roadmap

Q2 **2024**

- Token page update
- CRT private sale start
- Multi wallet connection
- AI-based non-biased crypto exchanges ranking
- CEXs and DEXs API connection
- Lock CRT for benefits

Q3

- Smart contract launch
- Coins Rating IDO
- Add token unlock schedule
- API for cryptocurrency overview provided by AI
- API update with AI features (white label)
- Purchase subscriptions in CRT

Q4

- AI-based news
- AI-powered portfolio suggestion
- AI-based trading signals and notifications
- Creation of custom indexes in regular language with AI
- API update with AI features (white label)

Q1 **2025**

- AI-based portfolio re-balancing
- AI Arbitrage signals
- API update with AI features (white label)
- Coins Rating's ecosystem loyalty program update
